AI SMART MEDICINE MANAGEMENT SYSTEM PRESENTATION

Technology has transformed our lives in unimaginable ways. From the dawn of the industrial revolution to the cutting-edge advancements of today, it continues to shape the way we live, work, and connect.

AI SMART MEDICINE MANAGEMENT SYSTEM

A WEB-BASED HEALTHCARE SOLUTION FOR SMART MEDICATION MANAGEMENT

PAGE 02

INTRODUCTION

The current era of technology is defined by rapid advancements that merge physical and digital realms. Technology enables greater efficiency, accessibility, and connectivity.

01

Healthcare is becoming increasingly digital, but many patients still struggle to manage their medications effectively. Missing doses, confusion about medicine timings, and language barriers can negatively impact treatment outcomes.

02

The AI Smart Medicine Management System is a web-based application designed to simplify medicine management through digital record keeping, scheduling, multilingual translation, and online medicine purchasing. By integrating AI-powered features, the system enhances medication adherence and provides a smarter healthcare experience.

EXISTING SYSTEM

EXISTING SYSTEM

TRADITIONAL MEDICINE MANAGEMENT RELIES ON
HANDWRITTEN PRESCRIPTIONS AND MANUAL
REMINDERS, WHICH OFTEN LEAD TO:
MISSED MEDICINE DOSES
DIFFICULTY TRACKING MULTIPLE MEDICATIONS
LANGUAGE BARRIERS WHILE READING PRESCRIPTIONS
LACK OF DIGITAL MEDICINE HISTORY
TIME-CONSUMING MEDICINE PURCHASES
THESE LIMITATIONS REDUCE TREATMENT
EFFECTIVENESS AND INCREASE THE POSSIBILITY OF
MEDICATION ERRORS.

PROPOSED SYSTEM

Proposed System

The proposed AI Smart Medicine Management System offers an intelligent and centralized platform where users can:

- Register and log in securely
- Manage medicine records digitally
- Schedule medicine reminders
- Translate medicine instructions into multiple languages
- Purchase medicines online
- Receive AI-assisted healthcare support

The system improves convenience, accuracy, and patient safety.

OBJECTIVES

- Develop a secure authentication system
- Digitally store medicine information
- Help users remember medicine timings
- Provide multilingual medicine translation
- Simplify online medicine purchasing
- Improve medication adherence using AI technologies

LOGIN MODULE

WLogin & Registration

The authentication module ensures that only authorized users can access the application.

Features

- User Registration
- Secure Login
- Session Management
- User Authentication
- Logout Functionality

DASHBOARD

User Dashboard

The dashboard serves as the central control panel of the application.

Users can easily navigate to:

- Medicine Management
- Schedule Module
- Translator
- Purchase Medicines

The interface is designed to be clean, responsive, and user-friendly.

Welcome, anjali singh

to me ▾

Hello 🙌,

This is your medicine reminder.

 Medicine: calpol

 Time: 8pm

👉 Please take your medicine on time.

नमस्ते 🙏,

यह आपकी दवा लेने की याद दिलाने के लिए है।

समय पर दवा लें।

Take care ❤️

DATABASE DESIGN

Containing the word:

	Table	Action
☐	cart	Browse Structure Search Insert Empty Drop
☐	medicine	Browse Structure Search Insert Empty Drop
☐	purchase	Browse Structure Search Insert Empty Drop
☐	schedule	Browse Structure Search Insert Empty Drop
☐	user	Browse Structure Search Insert Empty Drop
5 tables		Sum

DDatabase Tables

The application uses MySQL for secure data storage.

Main Tables include:

- User
- Medicine
- Schedule
- Translation
- Purchase

Each user can manage multiple medicines through relational database design.

FUTURE ENHANCEMENTS

Future Scope

The application can be further improved by integrating:

- **AI Chatbot for Healthcare Assistance**
- **OCR Prescription Scanner**
- **QR Code Medicine Recognition**
- **WhatsApp Reminder Integration**
- **Smartwatch Notifications**
- **Cloud Database**
- **Doctor Portal**
- **Caregiver Monitoring**
- **Android and iOS Applications**

**THANK YOU FOR
YOUR ATTENTION**
